

LOCK SWITCH

CKL5

CKL5 LOCK SWITCH WITH SNAP ON CK SWITCH MODULE

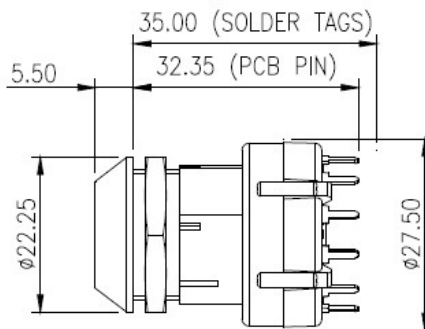

ELECTRICAL & MECHANICAL SPECIFICATION

Switch Rating:	1A @ 24V dc	Life:	>10,000 Cycles
Proof Voltage:	1,500V ac (Initial)	Lock Housing Material:	Zinc Alloy Bright Cr Plated
Insulation Resistance:	>999 MΩ at 500V dc (Initial)	Keys Material:	Mild Steel Ni Plated
Contact Resistance	<20 mΩ (Initial)	Housing Material:	Polycarbonate
Contact/Terminal Material:	Brass CZ108 Ag Plated	Wafer Material:	Polyamide 6.6 G.F V0 Rated
Operating Temperature:	-30°C to +85°C		

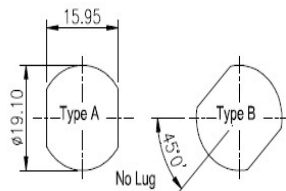

FEATURES

Single wafer switch	2 keys per switch as standard	All contacts are non-shorting BBM (break before make) 30°, 60° or 90° switch indexing	Two stage assembly: Lock through front and the module snaps on from the inside
Up to 4 poles per switch	Key inserted/removeable in 60° or 90° steps	5-disc lock Master key system available	Max panel thickness 3.4mm
Solder or PCB terminals Gold flashed or gold plated also available	Common or differ keys 200 combinations
